Use of land for a dwelling or small second dwelling

A lot used for a dwelling or small second dwelling must meet the following requirements:

- Access to the dwelling or small second dwelling must be provided via an all-weather road with dimensions adequate to accommodate emergency vehicles.
- The dwelling or small second dwelling must be connected to reticulated sewerage, if available. If reticulated sewerage is not available, all wastewater from the dwelling must be treated and retained within the lot in accordance with the requirements of the Environment Protection Regulations under the *Environment Protection Act 2017* for an on-site wastewater management system.

- The dwelling or small second dwelling must be connected to a reticulated potable water supply or have an alternative potable water supply with adequate storage for domestic use as well as for fire fighting purposes.
- The dwelling or small second dwelling must be connected to a reticulated electricity supply or have an alternative energy source.

35.04-314/12/2023
VC253**Subdivision**

A permit is required to subdivide land.

Each lot must be at least the area specified for the land in a schedule to this zone. If no area is specified, each lot must be at least 40 hectares.

A permit may be granted to create smaller lots if any of the following apply:

- The subdivision is the re-subdivision of existing lots, the number of lots is not increased, and the number of dwellings that the land could be used for does not increase.
- The subdivision is by a public authority or utility service provider to create a lot for a utility installation.

A permit must not be granted which would allow a separate lot to be created for land containing a small second dwelling.

VicSmart applications

Subject to Clause 71.06, an application under this clause for a development specified in Column 1 is a class of VicSmart application and must be assessed against the provision specified in Column 2.

Class of application	Information requirements and decision guidelines
Subdivide land to realign the common boundary between 2 lots where:	Clause 59.01
▪ Each new lot is at least the area specified for the land in the zone or the schedule to the zone. ▪ The area of either lot is reduced by less than 15 percent. ▪ The general direction of the common boundary does not change.	
Subdivide land into 2 lots where each new lot is at least the area specified for the land in the zone or the schedule to the zone.	Clause 59.12

35.04-405/09/2013
VC103**Long term lease or licence for accommodation**

A permit is required to lease or license a portion of a lot for a period of more than 10 years if the portion is to be leased or licensed for the purpose of Accommodation.

Each portion of a lot leased or licensed for the purpose of Accommodation must be at least the minimum subdivision area specified for the land in a schedule to this zone. If no area is specified, each portion of a lot leased or licensed for the purpose of Accommodation must be at least 40 hectares.

Decision guidelines

Before deciding on an application to use or subdivide land, lease or license a portion of a lot for a period of more than 10 years if the portion is to be leased or licensed for the purpose of Accommodation, construct a building or construct or carry out works, in addition to the decision guidelines in Clause 65, the responsible authority must consider, as appropriate:

General issues

- The Municipal Planning Strategy and the Planning Policy Framework.
- Any Regional Catchment Strategy and associated plan applying to the land.
- The capability of the land to accommodate the proposed use or development.
- How the use or development relates to rural land use, rural diversification, natural resource management, natural or cultural heritage management, recreation or tourism.
- Whether the site is suitable for the use or development and the compatibility of the proposal with adjoining land uses.
- Whether the use or development is essential to the health, safety or well-being of the State or area but is not appropriate to locate in an urban area because of the effect it may have on existing or proposed urban areas or the effect that existing or proposed urban areas may have on the proposed use or development.
- The need to minimise adverse impacts on the character and appearance of the area or features of architectural, scientific or cultural heritage significance, or of natural scenic beauty.
- The potential for accommodation to be adversely affected by vehicular traffic, noise, blasting, dust and vibration from an existing or proposed extractive industry operation if it is located within 500 metres from the nearest title boundary of land on which a work authority has been applied for or granted under the *Mineral Resources (Sustainable Development) Act 1990*.

Rural issues

- The maintenance of agricultural production and the impact on the rural economy.
- The environmental capacity of the site to sustain the rural enterprise.
- The need to prepare an integrated land management plan.
- The impact on the existing and proposed rural infrastructure.
- The potential for the future expansion of the use or development and the impact of this on adjoining and nearby agriculture and other land uses.
- The protection and retention of land for future sustainable agricultural activities.

Environmental issues

- The impact of the use or development on the flora and fauna on the site and its surrounds.
- The need to protect and enhance the biodiversity of the area, including the retention of vegetation and faunal habitat and the need to revegetate land including riparian buffers along waterways, gullies, ridgelines, property boundaries and saline discharge and recharge area.
- How the use or development relates to sustainable land management and the need to prepare an integrated land management plan.

- The location of on site effluent disposal areas to minimise impact of nutrient loads on waterways and native vegetation.

Design and siting issues

- The need to minimise any adverse impacts of siting, design, height, bulk, and colours and materials to be used, on landscape features, major roads and vistas.
- The location and design of existing and proposed infrastructure services which minimises the visual impact on the landscape.
- The need to minimise adverse impacts on the character and appearance of the area or features of archaeological, historic or scientific significance or of natural scenic beauty or importance.
- The need to locate and design buildings used for accommodation to avoid or reduce the impact from vehicular traffic, noise, blasting, dust and vibration from an existing or proposed extractive industry operation if it is located within 500 metres from the nearest title boundary of land on which a work authority has been applied for or granted under the *Mineral Resources (Sustainable Development) Act 1990*.

Primary school or secondary school issues

- Access being provided via an all-weather road with dimensions adequate to accommodate emergency vehicles and not rely on local residential streets for access.
- Access by public transport, or if public transport is not available or adequate, transport may be provided by the school. Where transport is provided by the school the parking of buses should be accommodated on site.
- Connection to reticulated sewerage if available or if not available, the wastewater must be treated and retained on-site in accordance with the requirements of the Environment Protection Regulations under the *Environment Protection Act 2017* for an on-site wastewater management system.
- In the absence of reticulated sewerage, a Land Capability Assessment on the risks to human health and the environment of an on-site wastewater management system constructed, installed or altered on the lot in accordance with the requirements of the Environment Protection Regulations under the *Environment Protection Act 2017*.
- Connection to a reticulated potable water supply or an alternative potable water supply with adequate storage for school use as well as for fire fighting purposes.
- Connection to a reticulated electricity supply or an alternative energy source.
